

**Midland Power Co. Limited.** is a gas based Independent Power Plant supplying power/electricity to Bangladesh National Grid through a 15 years Power Purchase Agreement with Bangladesh Power Development Board (BPDB) and Implementation Agreement with the Government of Bangladesh. Midland has full flagged O&M team for operation and maintenance of such kind of plant as well having a strong professional engineering team for project implementation. We are fully committed to our core values including 'get it right all time'.

A company goal is to grow the business through excellence in project delivery and client satisfaction. Midland undertakes to provide the necessary resources and management support to achieve this goal.

In particular, we have established and will maintain, review and continually improve our program for management of quality, environment, safety and health as applied to the provision of our services. This program requires us to:

- Understand client (now BPDB) requirements (contracts) and measure client satisfaction.
- Ensure that all personnel are competent to undertake the assigned tasks.
- Provide adequate information, training and supervision to employees and contractors on EHS policy.
- Plan project delivery processes to minimise risk and realise budget and schedule objectives.
- Monitor and evaluate processes and deliverables to ensure compliance with requirements of IFC guidelines on EHS including air emissions and ambient air quality.
- Take timely action to prevent occurrence or recurrence of nonconformity.
- Continually improve all areas of the EHS activities business, to the benefit of all interested parties.
